Fresh Agro is a blueberry growing plantation in Khoni, Georgia. Founded in 2017, we now utilize over 30 hectares of land for growing blueberries of various kinds, including but not limited to:

- | | |
|------------|-------------------|
| • Bluecorp | • Legacy |
| • Bluegold | • New Hannover |
| • Draper | • Hannah's Choice |

Fresh Agro stands above competitors by integrating energy efficient, self-sustainable storage/refrigeration warehouse and greenhouses in the production process, increasing the capacity. The refrigeration warehouse is installed with solar panels that allows Fresh Agro to produce our own energy.

At Fresh Agro, we believe in supporting the local agriculture by cooperating with local partners and achieving success through adhering to the highest standards to constantly deliver quality produce. The company today is in the process of acquiring a world-class assembly line for sorting, calibrating, and packaging which will improve the quality of our product and allow competing with global suppliers.

GEORGIA'S INNOVATION & TECHNOLOGY AGENCY
